

HARD-HAT-MOUNT HIGH NOISE HEADSET

HEAVY DUTY "PRO-SERIES" INDUSTRIAL TWO-WAY HEADSET

Headset can snap out into a rest position or pivot and rest on the back of the hard hat.

RIGHT EARCUP DETAIL

OVER-THE-HEAD MODEL

Model: HS32HH-TB5M

Our Two-way HS32 hard-hat-mount headset protects your hearing and provides you with clear receive and transmit audio in high noise environments. Built to strict specifications using only the highest quality components. The headset mounting system fits into all standard hardhats with side slots.

Connect to your radio via our plug-in "CB" cable (PTT is done via the ear cup push-to-talk) or In-line Big Button "XHPTT" Push-to-talk interface cable. Cables are available to connect to all makes and models of two-way radio.

Product Features

- Industrial strength headset construction
- EasyLink™ detachable cords offers ultimate flexibility
- Fully Adjustable Noise Cancelling Microphone
- Headset slot adapter fits into all standard hard-hat slots (hard hat sold separately).
- TB5M cable jack is a 5-pin XLR jack located in the headset cup... allows plug-in of our CB or XHPTT cables depending on your set-up requirement.
- Volume Up/Down is for hardwired cable versions.

Cable Options

"CB" Cables are a direct to radio connection with Push-to-talk (PTT) done via headset PTT. "XHPTT" Cables offer an in-line "Big Button" Push-to-talk (PTT). Both "CB" and "XHPTT" cables have TA5F plugs and connect via the TB5M jack on the headset.

Hardwired version direct plug-in versions are also available. Please inquire to see if we have this option available for your two-way radio.
