

## Hirose Adapters

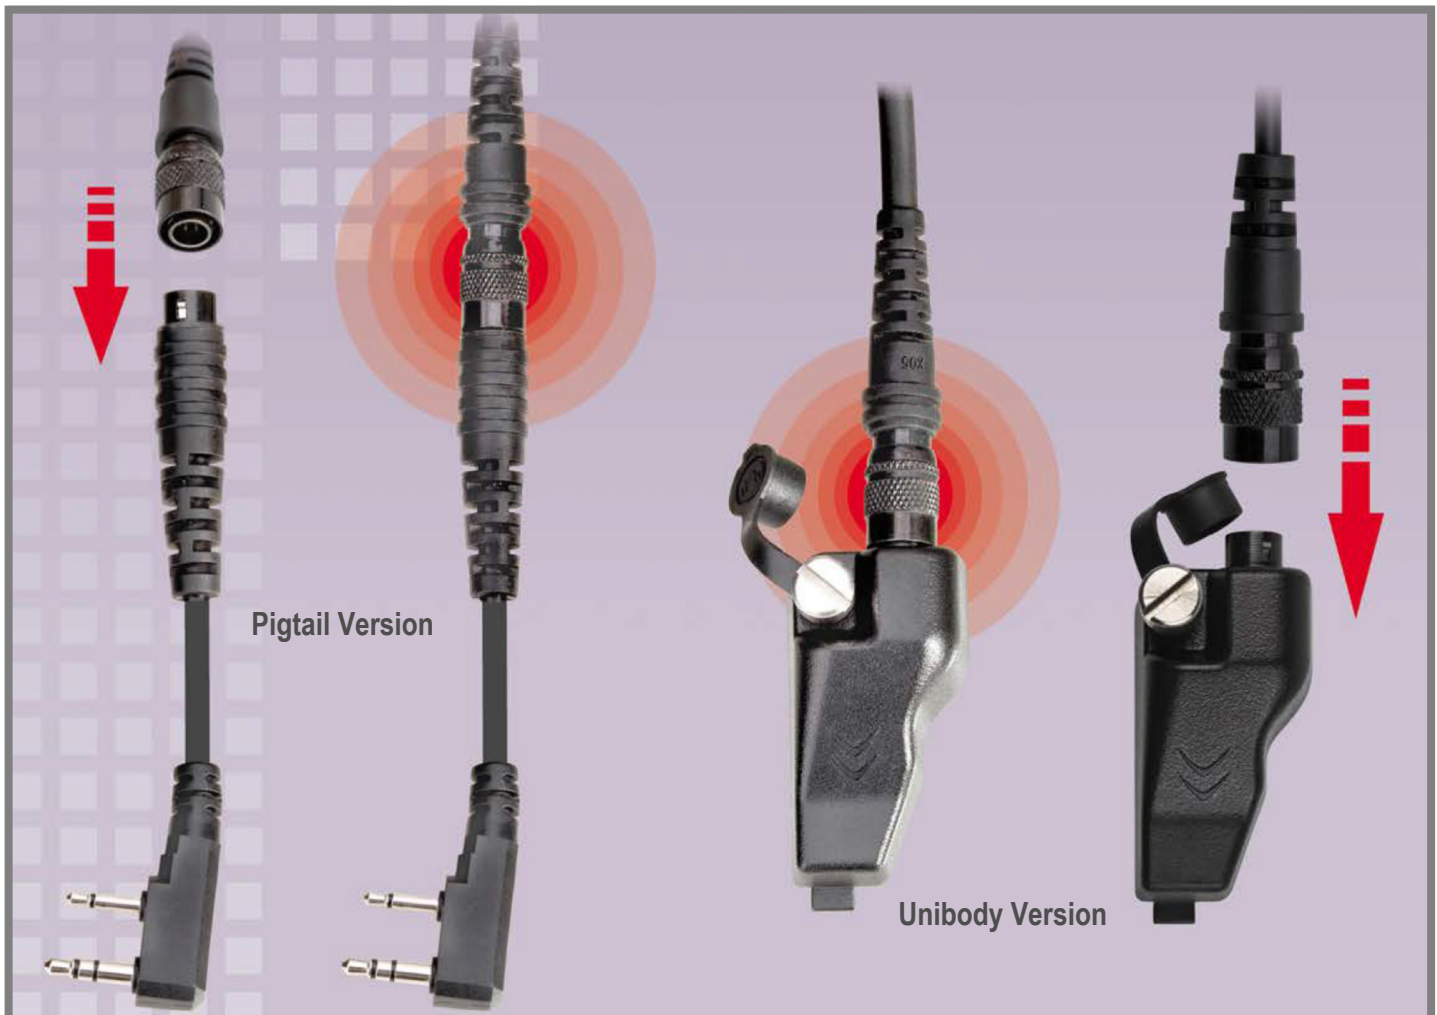

Hirose "HIR6" & "HIR6P" adapters from Cancom provide the user with a quick disconnect from the radio and ultimate flexibility. A number of different CanCom accessories are available with the "HIR6" connector. These accessories can connect to your radio by one of our two different types of Hirose adapters... Pigtail and Unibody.

### Hirose Adapters Offer Numerous Advantages & Features! These include:

- Prevent wear and tear on the radios accessory port, prolonging the life of your radio
- Easily share radios, simply use the quick disconnect to remove your accessory and pass the radio to the next user
- When not using the accessory simply remove it and the radio becomes live without removing the Hirose Adapter
- Hirose adapters are available for virtually all radio makes and models
