Freedom Wireless Instruction Sheet

LED
Shows the status of connection.

Right Side

Left Side

Volume
Adjusts headset speaker volume.

PTT Button
Triggers transmission of the radio connected to the transceiver.

AUX Radio Port

AUX Radio PTT
Triggers transmission of the AUX radio.

Power/Pair Button
Power Up : Press shortly the button ; LED becomes green – Instant On
Power Down : Press the button for 2 ~3 seconds until LED is amber.

Recharge Port
Use only 5 Vdc charger supplied.
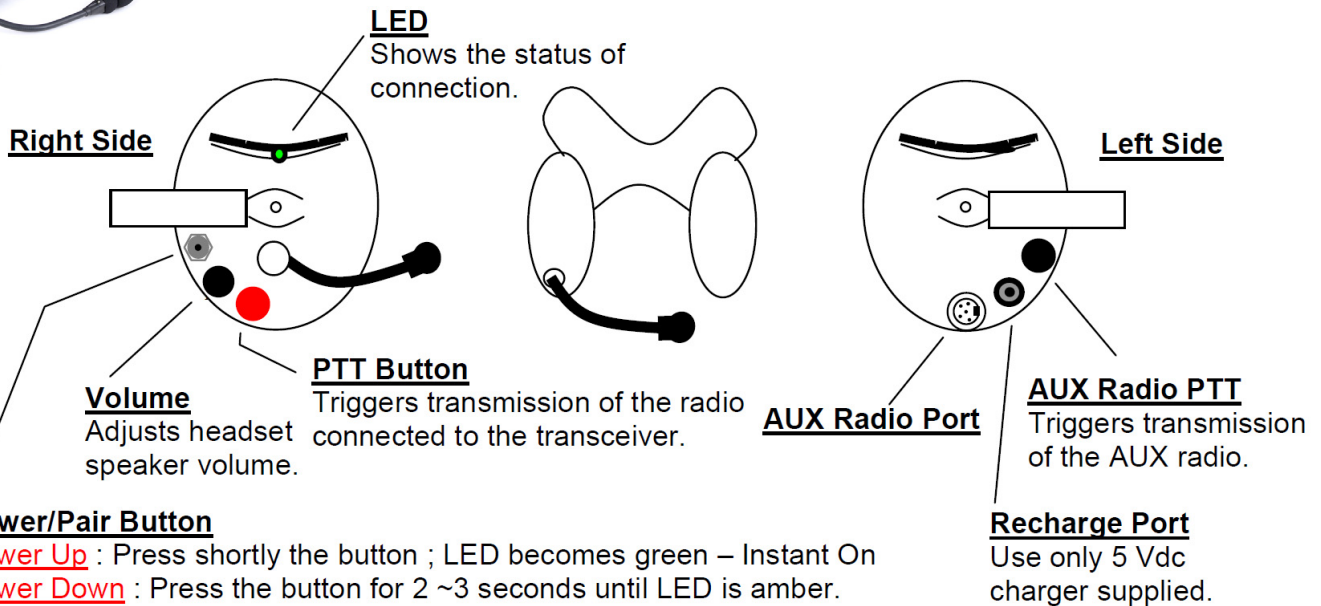

Note

1. How to check the battery level
   By LED : Count the Amber blink at powering up.
       3 blinks = over 80%, 2 blinks = 30 ~80%, and 1 blink = below 30%.
   By sound : Count the "BEEP" sound at powering up.
       3 beeps = over 80%, 2 beeps = 30 ~80%, and 1 beep = below 30%

2. Low Battery Warning
   If you hear a "BEEP" every 1 min while the headset is active, the headset battery is low and needs to be charged (usually it takes 3 hours for full charge).

3. How to pair
   (The new set is already paired and do not require pairing; Pairing is required only for a replacement unit.)
   a. Initiate pairing at the transceiver (*see the transceiver pairing instruction*)
   b. Make sure the headset power is off.
   c. Press the Power/Pair button for 7 ~ 8 seconds until you hear "beep beep beep" or watch for the LED change from green to amber.
   (Pairing and auto-connection takes about 45 ~ 50 seconds. Once the pairing is established, pairing is not required again.)
