

THROAT MICROPHONE KIT ACOUSTIC TUBE EARPIECE

Specialty Headset Series using
Vibration Technology

Model: XTM2A

Product Description

The XTM2A Throat microphone has single microphone element and comes complete with acoustic tube style earpiece. Very effective in eliminating outside noise during radio transmissions. The microphone element is covered with medical silica gel housing for a very comfortable feel. Neck strap is fully adjustable and suitable for active moving users. The XTM2A set-up can be hardwired through our Tactical PTT or come with a Nexus plug to connect into the XSMP speaker microphones jack.
