Product Description

The Heavy Duty Speaker Microphone is designed with a classic feel and built to meet the highest quality standards, making it ideal for demanding industries. It is waterproof with an IP56 rating and features a noise-cancelling microphone for clear communication in noisy environments. Equipped with RJ45 quick-disconnect cords, it allows for fast replacement and easy switching between different radio models.

Product Features

- HiViz Yellow Safety Speaker Microphone for high visibility and safety
- Watertight RJ45 connector with a replaceable cable for flexibility and compatibility with various radio models
- Large, metal-reinforced clip ensures enhanced durability
- 360-degree rotating clip with 8 adjustable positions for user convenience
- Heavy-duty, industrial-grade jacketed cables with superior strain relief for long-lasting performance in the field
- Compatible cables available for most radio makes and models
- High-quality condenser microphone element and powerful speaker deliver crisp, clear transmit audio
- Easy-to-use, large-button push-to-talk for quick access
- 3.5mm earphone jack for optional audio earpiece or headset (additional options available on separate sell sheet)
