NEW Headset Options...

XHSLOH Lightweight headset, One-sided. Without a doubt the best quality and most comfortable lightweight on the market!

Rubber sealed in-line Push-to-talk, rotating clip. Remote PTT jack

XBCH2 Temple/Bone Conduction headset. No need for a boom microphone... transmit via bone conduction transducer. Ears remain open.

*These headsets can also be used with our XSMP Mic/PTT

XSMP Speaker Mic/PTT

The CanCom XSMP Speaker Microphone is both a Speaker Microphone & Big-Button In-Line Push-to-talk. Dual PTT, IP56 rated, Rubber sealed housing. Works with Peltor headsets and CanCom two-way accessories!

Doing tours or training?

The **Guide™** from CanCom is an easy to use, multi-purpose communication system that offers superior sound quality & hearing protection. It can be utilized in high noisy environments such as factory tours, instructional/training, plant troubleshooting, working in groups, utility pole work and for cutting down trees.

- Over-the-head or Hard-hat-mount headset options.
- Transmission range of up to 75 feet.
- Noise Reduction Rating (NRR) of 21 dB.
- Option of two-way, receive only and hand held microphone.
- Affordable Pricing! Call or email us for retail and dealer pricing.

Wireless Options using Bluetooth Technology...

Freedom Wireless Headset

With unmatched wireless distance of 300-500 feet the Freedom Wireless Headset from CanCom allows communications over existing vehicle intercoms, portable or mobile radios. Available in Over-the-head and Behind-the-head models the NEW and improved Freedom Wireless has an internal antenna and Jumbo comfort GEL Ear Seals. Li-Ion battery charges in 3 hours and lasts for 24 hours. Easy pairing process, has Auto Shut-off when inactive and an Auto reconnect. The rugged construction is splash proof for all weather conditions.

Double Talk Wireless Headsets

Double Talk wireless headsets make communication with two people easy to use and cable free. With headset-to-headset wireless communications up to 1000 feet, a full-flex boom microphone and push-to-talk button, clear communications is only a button away! Eliminate the clutter of cables, simplify your communications and never be tethered again! Simple connectivity, superior comfort and audio performance in the harshest conditions.

Freedom Wireless Adapter Box

Turn any headset into a wireless headset with our Freedom Wireless adapter box. Simply plug your existing headset into the belt station and the transmitter into your radio or intercom. We offer all portable and mobile connector cables to plug-in the transmitter to your existing radio.

HS43 Wireless Headset

Connect your 2-way radio and Bluetooth cell phone for the ultimate wireless connection to stream music, answer phone calls, and enjoy it all without cables. In addition, the rubberized coating reduces scratches and aids in audio clarity. Professional features offer both comfort and clear audio performance to handle any need from racing, to industrial, to manufacturing applications.

Blue-X Adapters & Dongles for Portable & Mobile Radios

Use off-the-shelf lightweight cellular Style headsets on your portable or mobile two-way radio with our large selection of Blue-X Bluetooth adapters. Push-to-talk switch is on the adapter, optional remote Push-to-talk is easily connected. Easy "one button" pairing process. Also remembers paired connection even if the radio is turned off. No time delay on transmit or received audio messages.
