### Product Description

The GUIDE system offers clear person-to-person and group communications in high noise areas. It is the perfect solution for communications between work teams, plant maintenance, training and tour applications. The Guide is the best performing, most affordable system on the market.

### Product Features

- 3 license free channels deliver high interference free sound quality with 75 feet range
- Hand-held microphone allows the group leader to speak while a second mic can be shared for questions in tour group applications
- Microphone is noise cancelling and voice activated, uses two AA batteries
- All units use and include two AA batteries. Battery life is 40 hours for receivers and 8-10 hours for hand-held microphone
- Low battery alert LED light flashes with approx. 20 mins of life remaining
- Comfortable headsets with low pressure and soft ear cushions provide an ANSI certified NRR rating of 25dB
